Register for 2019 CCAMS School now

This year's Measurement School will be held February 19- 20, 2019 in sunny Corpus Christi, Texas. Be ready to learn new skills in the field of measurement, talk with professionals with years of experience, try out new technology and equipment, and meet new friends and colleagues. All of this done to not only help you and your career, but also raise money for student scholarships. Help spread the word by telling work colleagues and clients, Register at: www.ccams.info.

Planning to stay in Corpus Christi?

CCAMS has once again partnered with the Omni Bayfront Hotel in Corpus Christi and arranged special hotel rates for attendees. Call (800) THE-OMNI or direct at (361) 887-1600 before January 24, 2019 to arrange your discounted stay. And don't forget lunch will be available to attendees who pre-purchase meals during the online registration.

Classes provide CCAMS School attendees with unique learning opportunities.

Board finalizes plans for upcoming 2019 School

The Board of Directors of the Corpus Christi Area Measurement Society recently met to wrap up plans for this year's Measurement School to be held February 19-20, 2019.

Each year brings unique challenges and the 2019 school is no exception. With the oilfield industry always in flux, organizers must look at trends and changes in markets to gauge what students expect to learn.

"We want the students to walk away from the school with an enhanced understanding of their jobs as well as new information that will help them meet the challenges of the future," Board member Dominic Martínez said. "We believe *Continued on page 2*

Scholarship Recipient Spotlight

In September, we checked in on Scholarship recipient, Brandon Wiggins, who is attending Texas A&M University in College Station, Texas. Brandon was awarded a scholarship in 2017 and 2018. Brandon is a sophomore, studying kinesiology and is a member of the Corp of Cadets and Squadron 23. He was awarded Best Drilled Freshman this past Spring.

Brandon says, " My first year at A&M was full of learning and growth. The CCAMS Scholarship has given me the opportunity to focus on my class work. I am able to pursue my degree while developing my leadership and time management skills."

Brandon says he is "truly thankful" for the opportunity the CCAMS Scholarship has provided and reminds everyone "Gig 'em Aggies!" You make us proud, Brandon and good luck with your studies!

 John Martin - Board Member
 Bill Stahl - Board Member
 Jim Lee - Special Advisor

we are providing that for our students and do so each year with classes, vendor displays, and networking opportunities."

The Measurement School centers around classroom lectures that provide students an opportunity to hear from industry professionals who are ready to share experience and knowledge with attendees. Classes featuring troubleshooting common problems in the field with metering equipment, improving accuracy of equipment, and preparing samples for laboratory analysis will be available to students. The class schedule is already available at: www.ccams.info.

The School also offers students hands-on training. New equipment and technology will be available for students to use so that they can become familiar with their capabilities. Instructors will be there to assist in learning about equipment functionality.

For some attendees, the School provides an opportunity for collaboration. Meeting new colleagues who complement and augment one's own skills can yield mutual benefit. In fact, many have found that the School has helped grow business. Others have established relationships that help in their day-to-day work.

The School also helps raise funds for scholarships. In the Spring the CCAMS Scholarships are awarded to help students headed to colleges and trade schools achieve their higher education goals.

Overall, the School provides a unique opportunity for the South Texas area. Attendees learn information and skills they would otherwise have to travel miles to experience. Ask anyone who has attended before, and they'll say that's why they are back again!
